Pavlo Shtefanesku

Quality Assistance Lead Engineer

Hey, I'm Pasha

Starting my career as a AQA Engineer in 2013, I honed my expertise in **automation testing**, driven by the belief in seamless processes and empowered decision-making. From creating test cases to later responsibilities in **requirement analysis**, developing frameworks from scratch and CI support, I evolved into an autonomous QA engineer who leads by example. I advocate for paradigm shift from Quality Assurance to **Quality Assistance**, emphasising **Continuous Testing** throughout the entire development process. This approach ensures a higher quality and reliability in the final product.

Experience

● 2018 - Present

Finder
Senior QA engineer, Wrocław
Assisted building and delivering multiple projects throughout the whole process. Proactively **analysed** software projects within different stages like **requirements definition, design verification**, implementation, and post go-live maintenance. Designed user journeys in collaboration with PM and Dev (Three Amigos). Delivered 90% e2e test coverage for new web features and API services using **cypress & cucumber**. Introduced new testing standards, led meetings, and incentivised improvements in QA collaboration. Mentored junior engineers.

● 2016 - 2018

Intive
Middle QA engineer, Wrocław
Actively involved in developing POC of automated frameworks for web and mobile applications: **Selenium** tests in **Java** and **C#** for web, **Appium** with Java for mobile, Java, **javascript** for **API** tests.

● 2013 - 2016

Softserve
Automation QA engineer, Chernivtsi
Analysed and improved manual test scenarios. Increased e2e automated test coverage by writing smoke, acceptance, and regression cases using **Java+Selenium** framework. Delivered effective reports about completed test runs. Involved in improvements of API test cases.

Education

● 2006 - 2010

Bachelor degree in Computer Science
Chernivtsi National University , Ukraine
Computer systems and networks, algorithms, computer programming, probability theory, etc.
